SUMMARY

Skilled multitasker with superior work ethic and strong written and verbal communication skills. Reliable and dedicated team player looking to secure a challenging position in a dynamic organization where I can utilize my skills and knowledge for mutual growth and development

EDUCATION

B.TECH in Computer science and Engineering | College of Engineering Poonjar

6.75 • Nov 2022 – Jul 2026 • Kottayam, India

High secondary Education | Muslim Girls Higher Secondary School, Erattupetta

92% • Jul 2022 – Jul 2022 • Erattupetta, India

Secondary School Education | Carmel Rani Public School, Variyanikad

77% • Jul 2020 – Jul 2020 • Variyanikad, India

SKILLS

- **Programming Languages:** Python, JavaScript, C, Java
- **Web Development:** React.js, Node.js, Express.js, REST API Development
- **Database Management:** MongoDB, MySQL
- **DevOps & Tools:** Docker, Git & GitHub, Overleaf, Postman, Render, Vercel
- **CORE CS CONCEPTS:** DSA, OOP, DBMS
- **Soft Skills:** Multitasking and Task Prioritization, Team Collaboration and Interpersonal Skills, Problem Solving

PROJECTS

CANTEEN AUTOMATION SYSTEM | Frontend design

MERN Stack Project

- Developed a MERN-based Canteen Automation System to automate food ordering, seat booking, and payment workflows.
- Implemented QR-based authentication and digital receipt generation for secure and transparent transactions.
- Built real-time order tracking and notification features to improve user experience and reduce waiting time.
- Designed responsive multi-device frontend interfaces using React.js and modern UI principles.
- Integrated RESTful APIs for authentication, order management, seat management, and reporting functionalities.
- Developed admin features for sales reporting, order monitoring, and canteen management operations.
- Utilized MongoDB, Express.js, React.js, and Node.js for full-stack application development.
- Collaborated in a 4-member team with primary responsibility for frontend design and user experience development.

DermaSense AI: An Integrated Healthcare Platform for AI-Driven Skin Disease Classification, Virtual Psychiatric Support, and Clinical Appointment Management | AI-Powered Healthcare Platform

- Developed a deep learning-based healthcare web application for real-time skin disease detection using CNN models.
- Built a MERN stack platform with role-based dashboards, appointment booking, and real-time notifications.
- Integrated Gemini API-based AI chatbot for mental health support and backend APIs for image upload and disease prediction.

Smart Food Distribution | Django-Based Web Platform

- Developed a Django-based web platform connecting restaurants and NGOs to reduce food waste through surplus food distribution.
- Implemented real-time notifications using WebSockets and volunteer logistics management features.

- Built interactive analytics dashboards and integrated Docker for containerized deployment.

AI Desktop Agent | AI-Powered Automation Assistant

- Developed an AI-powered desktop automation assistant using React and Node.js for voice-controlled workflow automation.
- Implemented smart command execution, productivity modes, screenshot capture, and application management features.
- Built real-time system monitoring functionalities including CPU, RAM, battery, and memory tracking.

VOLUNTEERING

Secretary | IEEE ComSoc

Engaged in professional and technical society activities.

PUBLICATIONS

Design of an Improved Method for Visual Rendering in the Metaverse Using CIEM and MSRA Net

B.Tech – Final Year (Undergraduate Level) A study on enhancing visual rendering in the metaverse through the Cooperative Insect Eye Model (CIEM) and MSRA Net-based architecture. The proposed method achieves wide-angle, high-resolution views with improved efficiency, personalization, and reduced computational cost, enabling immersive and energy-efficient metaverse experiences.

CERTIFICATIONS

Crash Course on Python | Brilliant computer education centre

Gained hands-on skills in Python programming including data types, loops, functions, and error handling.

AI for Students: Build Your Own Generative AI Model | NxtWave | Dec 2024

Certificate of participation in workshop.

Introduction to cloud computing | IEEE | Aug 2025

Certificate of participation in workshop.

Docker Certification | Udemy

Gained hands-on skills in containerization, including creating and running containers, working with Docker Hub images, and writing simple Dockerfiles.

INTERNSHIPS/WORKSHOPS

I-Net infotech, North Cochin-18

Jun 2025 – Jul 2025, Python Department

Jun 2025 – Jul 2025, Jun 2025 – Jul 2025, Python Department Provides a healthcare management solution with doctor, patient, and pharmacist modules, enabling appointment booking, prescription management, medicine availability tracking, and digital receipts with secure data handling. Technologies and Projects: Python, Django Gained hands-on experience in database management (SQL), API development, and responsive web design Improved knowledge of notification systems (reminders/WhatsApp integration) and healthcare workflow automation

EXTRA CURRICULAR ACTIVITIES

IEEE ComSoc Secretary, SB CE Poonjar

Engaged in professional and technical society activities.
