

ABHIRAMI AJI

Software Engineer | Python Developer | AI/ML

Kottayam, India | abhiramiaji621@gmail.com | +91 9074801318 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Recent B.Tech Computer Science Engineering graduate with a strong foundation in Python and software development, and hands-on experience building full-stack and AI/ML-driven applications using FastAPI, React, TensorFlow/Keras, and MongoDB. Experienced in REST API design, backend development, computer vision, and Docker/cloud fundamentals through multiple end-to-end projects and a Python/Django backend internship.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, Java, C

AI / Machine Learning: Machine Learning, Deep Learning, CNN, TensorFlow, Keras, Pandas, Computer Vision, NLP, Sentiment Analysis, Generative AI, Prompt Engineering, LLM API Integration, Model Training & Evaluation, Data Preprocessing.

Backend / APIs: FastAPI, Node.js, Express.js, REST APIs, API Integration

Databases: MongoDB, MongoDB Atlas, MySQL

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap

Cloud / DevOps: Docker, AWS Fundamentals, Git, GitHub, CI/CD Concepts, Linux Basics

PROJECTS

TradeMind AI — AI-Powered Market Intelligence Platform | *React, FastAPI, Fireworks AI, REST APIs*

- Built a Python/FastAPI backend integrating Yahoo Finance, NSE market data, and NewsAPI with Fireworks AI (LLM) to generate contextual market analysis and sentiment insights.
- Developed a React dashboard to visualize market trends and AI-generated insights for an intelligent trading assistant focused on Indian markets.

DermaSense AI — AI-Driven Skin Disease Classification Platform | *Python, TensorFlow/Keras, CNN, MERN, Gemini API*

- Built a CNN-based deep learning pipeline for skin disease classification across 14 condition classes, covering image preprocessing, model training, and evaluation.
- Integrated the classification pipeline with a MERN backend via REST APIs, and added a Gemini API-based generative AI chatbot for user support.

Canteen Automation System | *MERN Stack, REST APIs, MongoDB Atlas*

- Built a full-stack MERN platform for food ordering and seat booking with QR-based authentication, as frontend lead for a 4-member team.
- Developed REST APIs for authentication, order management, and admin reporting; optimized database operations using MongoDB Atlas.
- Designed responsive React.js interfaces, including order tracking and admin dashboards.

EXPERIENCE

Python Department Intern — I-Net Infotech

- Contributed to a healthcare Django application, working on API development and data handling.
- Gained hands-on experience with Python backend development in project setting.

EDUCATION

B.Tech, Computer Science & Engineering — College of Engineering Poonjar (APJ Abdul Kalam Technological University)

CGPA: 6.83 | Nov 2022 – Jul 2026

CERTIFICATIONS

- Docker Certification — Udemy (Containerization, Dockerfiles, Docker Hub)
- Introduction to Cloud Computing — IEEE (Aug 2025)
- AI for Students: Build Your Own Generative AI Model — NxtWave (Dec 2024)
- Crash Course on Python

LEADERSHIP & ACTIVITIES

- Secretary, IEEE Communications Society
- Presented an academic seminar based on an IEEE research paper on Metaverse Rendering (CIEM, MSRANet)
